

HSTAR 750 Series

Hermetically Sealed High Temperature AC-LVDT Position Sensors

Description

Macro Sensors' HSTAR 750 Series of 3/4 inch (19 mm) diameter AC-operated LVDTs is designed for a wide range of position measurement applications. These are rugged hermetically sealed sensors, constructed entirely of stainless steel, and intended for use at high temperatures (400°F). The coil windings are sealed against hostile environments to IEC standard IP-68 and electrical termination is through a sealed radial connector located near one end. The mating connector plug is supplied with the unit.

The radial connector offers two important benefits. First, it results in a through-bore design, which permits access to either or both ends of the LVDT's core for better mechanical support and core guidance, and easier cleanout in dusty or dirty locations. The second advantage of the radial connector is shorter installed length compared to units of the same range with axial connectors.

Available in ranges of ± 0.050 inch (± 1.25 mm) to ± 10.0 inches (± 250 mm), HSTAR 750 Series sensors feature the high resolution, excellent repeatability, and low hysteresis associated with LVDT technology, as well as the highest sensitivity

Features

- Ranges of ± 0.050 inch to ± 10.0 inches
- 400°F (200°C) operating temperature
- Radial connector; through-bore operation
- Environmentally sealed to IEC IP-68
- Non-linearity less than $\pm 0.25\%$ of FRO

Applications

- Beam scraper positioning feedback
- Hydraulic cylinder position
- Steam valve positioning
- Power generation applications
- Corrosive environments

consistent with good linearity. The maximum linearity error for any of these sensors is $\pm 0.25\%$ of full range output using a statistically best-fit straight line derived by the least squares method.

Macro Sensors offers several standard options that permit a user to customize HSTAR 750 LVDTs, including Teflon® bore liners and metric threaded cores, as well as smaller diameter and low mass cores. In addition, Macro Sensors can provide a range of mounting accessories and core extension rods. HSTA Series units can also be supplied to withstand exposure to mild radiation (3×10^7 Rads). On special order, the HSTAR 750 Series can also be constructed for immersion in pressurized fluids.

All HSTAR 750 Series LVDTs will operate properly with any conventional differential input LVDT signal conditioner. Ranges of 1.00 inches or greater will also work with ratiometric LVDT signal conditioning. Macro Sensors offers a full line of LVDT signal conditioners that will deliver optimum performance from any HSTAR 750 Series LVDT. General Specifications

- Input Voltage:** 3.0 V_{rms} (nominal)
- Input Frequency:** 2.5 to 3.0 kHz
- Linearity Error:** $\pm 0.25\%$ of FRO
- Repeatability Error:** <math>< 0.01\%</math> of FSO
- Hysteresis Error:** <math>< 0.01\%</math> of FSO
- Operating Temperature:** -65°F to +400°F (-55°C to +200°C)
- Thermal Coefficient of Sensitivity:** -0.01%/°F (nominal) (-0.02%/°C nominal)
- Vibration Tolerance:** 20 g to 2 kHz
- Shock Survival:** 1000 g, 11 ms

Ordering Information

- For standard HSTAR 750, order by model number with range.
- For metric threaded core option, add -006 after model number with range.
- For Teflon® bore liner option, add -010 after model number with range (not available with -080 option).
- For small diameter core option, add -020 after model number with range.
- For mild radiation option, add -080 after model number with range.
- For multiple options, add sum of dash numbers after model number with range.
- For accessories and compatible support electronics, please visit our website at www.macrosensors.com.
