

# Model 3400 Intrinsically Safe Load Cell

- Stainless steel construction
- Sealed connector
- IP68 environmental protection
- Internally amplified 4-20 mA output, loop-powered
- Unipolar (T or C) or bipolar (T and C)
- Zero and span adjustment access
- CE certified
- Explosion protection by Intrinsic Safety (approval pending) per ATEX designation: II 2 G Ex ib IIC T4

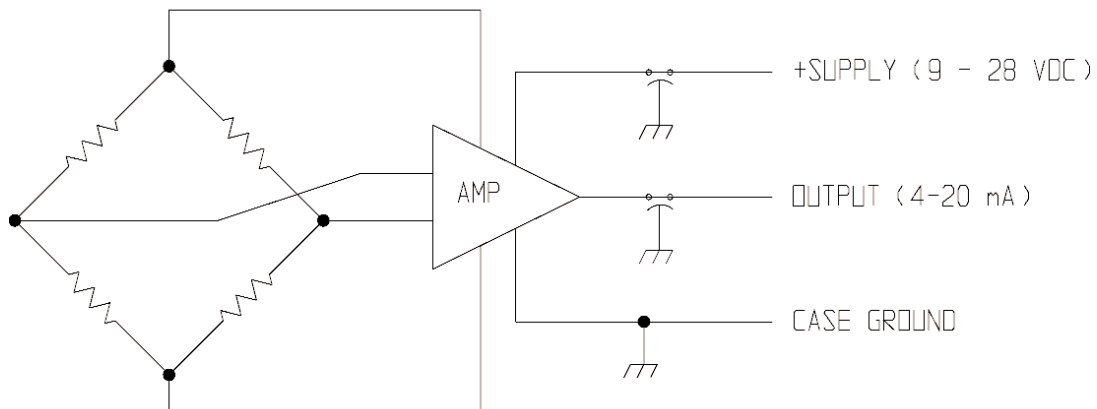

*Specially designed load cells with loop-powered intrinsically safe amplified output for use in oil field and other hazardous locations. These load cells are derived from other proven Interface models by adding high resistance strain gages for low-current loop power and shielded internal amplifier for extra low emissions and minimal EMI susceptibility.*

## SPECIFICATIONS

PARAMETERS	ALL MODELS
<b>ACCURACY – (MAX ERROR)</b>	
Nonlinearity-% FS	±0.10*
Hysteresis-% FS	±0.08*
<b>TEMPERATURE</b>	
Compensated Range-°F	0 to 150
Compensated Range-°C	-18 to 65
Operating Range-°F	-40 to 200
Operating Range-°C	-40 to 93
Zero Balance	4.00 ±0.10 mA Unipolar 12.00 ±0.10 mA Bipolar
Rated Output	16.000 ±0.016 mA Unipolar ±8.000 ±0.008 mA Bipolar
<b>ELECTRICAL</b>	
Excitation Range	+9 to +28 VDC
Maximum Loop Resistance	0 ohm @ 9VDC Excitation 950 ohm @ 28VDC Excitation

*\*Some capacities of some models have higher performance specifications, contact factory for details.*

# Model 3400 Intrinsically Safe Load Cell

The Model 3400 is a family of load cells of various mechanical configurations, all with the same internal 4–20 mA loop-powered amplifier and 4000-5000 ohm strain gage bridge. All load cells in the family are intrinsically safe when installed per the installation manual and are certified as such by the following Notified Body:

**Physikalisch-Technische Bundesanstalt**  
Braunschweig, Germany

Intrinsic Safety is an explosion protection technique that ensures that a circuit operating in an explosive atmosphere cannot cause ignition. This is done by limiting the electrical and thermal energy in the load cell. The 3400 protection is for Zone 1 and the ATEX designation is:

II 2 G Ex ib IIC T4

Specific Models 3401 through 3499 are unique in being constructed in accordance with the certified circuit. Configurations for mechanical connections and force capacities are created to fit individual applications. The following are representative of specific models.

## Tension - Compression Low Profile Type

Dimensions See Drawing	MODEL							
	3410		3412		3414		3416	
	CAPACITY (lbf)							
	100, 250, 500, 1K		2K, 5K		10K		20K	
	inch	mm	inch	mm	inch	mm	inch	mm
