

HSA 750-006 Series

Hermetically Sealed AC-LVDT Position Sensors

Features

- Ranges of ± 1 mm to ± 250 mm
- In-line connector, mating plug included
- Environmentally sealed to IEC IP-68
- Non-linearity less than $\pm 0.25\%$ of FRO

Applications

- Machine tool positioners
- Materials testing extensometers
- Hydraulic cylinder position
- Valve position sensing
- Automatic assembly equipment
- Corrosive environments

Description

Macro Sensors' HSA 750 Series of 19.0 mm diameter AC-operated LVDTs is designed for a wide range of position measurement applications. These are rugged hermetically sealed sensors, constructed entirely of stainless steel, and intended for general industrial use. The coil windings are sealed against hostile environments to IEC standard IP-68 and electrical termination is through a sealed axial connector. The mating connector plug is supplied with the unit.

Available in ranges of ± 1 mm to ± 250 mm, HSA 750 Series sensors feature the high resolution, excellent repeatability, and low hysteresis associated with LVDT technology, as well as the highest sensitivity consistent with good linearity. The maximum linearity error for any of these sensors is $\pm 0.25\%$ of full range output using a statistically best-fit straight line derived by the least squares method.

Macro Sensors offers several standard options that permit a user to customize HSA 750 LVDTs, including Teflon® bore liners and smaller diameter, low mass cores. In addition, Macro Sensors can provide a range of mounting accessories and core extension rods. On special order, the HSA 750 Series can be constructed for resistance to mild nuclear radiation, as well as for immersion in pressurized fluids and to withstand higher operating temperatures.

All HSA 750 Series LVDTs will operate properly with any conventional differential input LVDT signal conditioners, but operation with ratiometric LVDT signal conditioning is not recommended. Macro Sensors offers a full line of LVDT signal conditioners that will deliver optimum performance from any HSA 750 Series LVDT. General Specifications

- Input Voltage:** 3.0 V_{rms} (nominal)
- Input Frequency:** 2.5 to 3.0 kHz
- Linearity Error:** $\pm 0.25\%$ of FRO
- Repeatability Error:** <math>< 0.01\%</math> of FSO
- Hysteresis Error:** <math>< 0.01\%</math> of FSO
- Operating Temperature:** -55°C to +105°C
- Thermal Coefficient of Sensitivity:** -0.02%/°C (nominal)
- Vibration Tolerance:** 20 g to 2 kHz
- Shock Survival:** 1000 g, 11 ms

Ordering Information

For Teflon® bore liner option, add -010 after model number with range.
 For small diameter core option, add -020 after model number with range.
 For multiple options, add sum of dash numbers after model number with range.
 For accessories and compatible support electronics, please visit our website at www.macrosensors.com.
